Work Experience

Amazon

Hyderabad, India

SOFTWARE DEVELOPMENT ENGINEER INTERN

May 2026 - Jul. 2026

- Owned migration of a production **cash-to-digital payments API** to a cloud-native platform, spanning service logic, data access, routing, infrastructure, and observability with zero customer impact.
- Designed an **exactly-once idempotency state machine** using conditional writes and lazy recovery, preventing duplicate or lost transactions under retries and concurrent requests.
- Solved **cross-region consistency** with sticky user-to-region routing and implemented read-back recovery for indeterminate downstream order-creation failures.
- Implemented **GDPR/CCPA data deletion** with least-privilege cross-account access, event-driven processing, and comprehensive testing.

Education

Indian Institute of Technology (ISM), Dhanbad

Aug. 2023 - May 2027

B.TECH. IN COMPUTER SCIENCE AND ENGINEERING

CGPA: 8.3/10.0

Projects

Atlas

source

CONTENT-ADDRESSED ENCRYPTED STORAGE

- Built a content-addressed storage system using **FastCDC**, **BLAKE3**, **ChaCha20-Poly1305**, and **deduplication** for encrypted file storage.
- Engineered **concurrent FUSE I/O**, **replication/reconciliation**, snapshots, and crash-safe garbage collection with SQLite-backed metadata.
- Optimized large uploads by separating chunk transfers from metadata operations; validated recovery and integrity through extensive testing and multi-GB end-to-end verification.

Koto

source

REAL-TIME TASK MANAGER

- Built a persistent hierarchical task system with **SQLite WAL**, **REST APIs**, **WebSockets**, **token authentication**, and **real-time multi-client synchronization**.
- Implemented recursive tree operations, recurring state transitions, and a TUI/web client; deployed as a hardened systemd service.

Diodos

source

CROSS-PLATFORM NETWORK DAEMON

- Built a cross-platform daemon that **detects captive portals and automatically authenticates**, with persistent session handling.
- Implemented OS-specific daemon lifecycle, networking, and **cross-platform smoke/CI testing** across Linux, macOS, and Windows.

Skills

Languages	Java, Python, C++, C, JavaScript/TypeScript
Frameworks & Backend	Spring Boot, Flask, Django, React.js, Textual, REST APIs, WebSockets
Databases & Storage	DynamoDB, SQLite, MySQL, Firestore, MongoDB
Cloud & Tools	AWS, Git, Bash, Linux, Docker
Concepts	Distributed Systems, Concurrency, Idempotency, API Design, Encryption, Data Structures & Algorithms

Achievements

- Codeforces**: Max rating: **1893**, 644 solved problems Profile
- CodeChef**: Max rating: **2110**, 155 solved problems Profile
- LeetCode**: Max rating: **2151**, 152 solved problems Profile
- IICPC CodeFest '26**: Secured **118th** rank in the Regionals.
- IICPC CodeFest '25**: Secured **100th** rank in the Regionals.
- Codeforces Round 1045 (Div. 2)**: Secured a **87th** rank. Contest

Extracurricular Activity

- Head of Technical team of Conchetto'25 - The Annual Technical Fest of IIT Dhanbad IIT Dhanbad
- Member of Animation and Game Design Club IIT Dhanbad
